Written a number of years ago and not published until 2017, it tells the story of a virus that mutates people but wait, it also mentions a virus that killed off a lot of elderly people in 2022, spooky.

Only a couple of years out of the real thing. Lets hope the rest of it doesn't happen or we will be running from aliens, zombies and who knows what!

The story follows Alex, Daniel, Samantha and 'Frank' as they find their destinies in the new world.

There is plenty of humour, romance, action, no hard swearing and it is suitable for around

twelves years to adult.

The follow up is due out for Christmas.
